

You can

HELP THE SAWFISHES

Learn

- There are 5 species of sawfish
- Some sawfish can grow to 23 ft (7 m)
- Sawfish are threatened with extinction due to fishing, habitat destruction and the shark fin trade

Share

Visit www.sawfishconservationsociety.org and share your sawfish encounters.

Conserve

Please release all captured sawfish quickly and without removing their saws, report sawfish encounters and pick up trash you find in the water and on land.

The Sawfish Conservation Society (SCS) and its partners aim to inform and educate the public about sawfish, which are threatened with extinction, and provide an environment to encourage cooperation between researchers, aquarists and fishers to maximize research efforts.

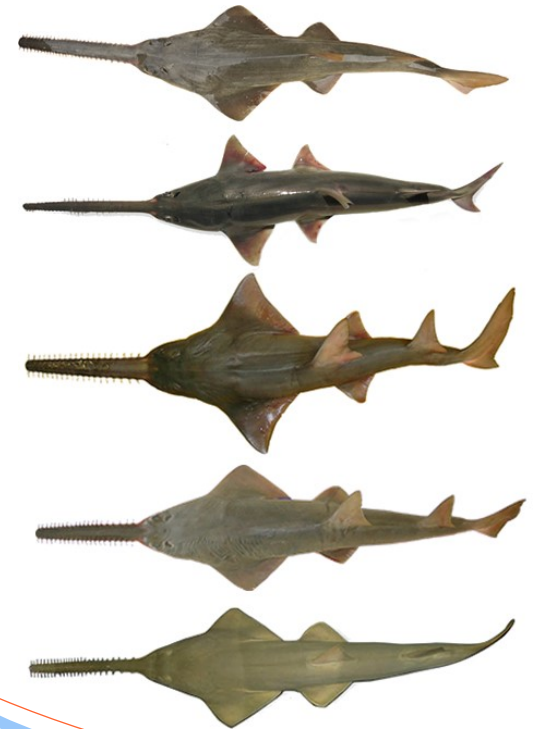

Please join our group on Facebook or share, play and learn about sawfish at www.sawfishconservationsociety.org.
